

# Produce Labor Conference

Federal Labor Policies · Proven Real World Solutions  
Technology Demos · Latest Field & Packing Innovations

The agricultural labor shortage impacts the bottom lines of all produce growers. Update yourself on federal policies, learn what other growers are doing, see technology demos, and hear innovations for labor and be part of the solution. **PLEASE attend!**

CFVGA's first-ever Labor Conference will discuss a variety of aspects contributing to the farm labor shortage, including but not limited to agricultural worker housing, guest worker federal policies and innovative solutions for fields and packing houses.

Requests for Proposals for individuals and companies wishing to demonstrate tech or pitch ideas and innovations during this conference will be accepted through Oct. 15. See website below for more information and RFP applications.

This conference is scheduled to directly follow the Colorado Agriculture and Farm Labor Summit conference, Dec. 3-4, in Colorado Springs in hopes that farm worker service providers and advocates will participate and foster new solutions.

**December 5, 2018**  
**8:00am - 4:00pm**
